

# Tips for a Safe Harvest

Harvest season brings hard work and can be an exhausting, but rushing the job to save time can be extremely dangerous (even deadly!) when working near overhead power lines. We urge farm operators and workers to keep the following safety tips in mind:

**Use care when operating large machinery near power lines.**

**Inspect the height of equipment to determine clearance.**

**Always keep equipment at least 10 feet away (in all directions) from power lines.**

**Remember to lower extensions when moving loads.**

**If a power line is sagging or looks to be dangerously low, please call us immediately.**
