

## If You Smell Gas

Never assume a gas odor is a sign your tank is running low. If you smell gas in the house, or if you have a gas alarm that signals the presence of gas, IMMEDIATELY follow these suggestions:

### No Flames or Sparks

Immediately put out all smoking materials and other open flames. Do not operate lights, appliances, telephones, or cell phones. Flames or sparks from these sources can trigger an explosion or a fire.

### Shut Off the Gas

Turn off the main gas supply valve on your propane tank if it's safe to do so. To close the valve, turn it clockwise (see diagram below).

### Report the Leak

From a neighbor's home or other nearby building away from the gas leak, call HomeWorks at 877-574-2740 right away. If for some reason you can't reach us, call 911 or your local fire department.

### Leave Immediately

Get everyone out of the building or area of the suspected leak.

### Do Not Return to the Building or Area

Do Not Return to the Building or area until we determine that it is safe.

### Get Your System Checked

Before you attempt to use any of your propane appliances, a qualified service technician must check your entire system to ensure that it is leak-free.
